A: Perhaps you can use SCS's link for the driver download: A: How about the Official Bluetooth VAS5054A bluetooth dongle Drivers from Cyanogen. Please follow the below steps to find and install the driver in windows, Download the Driver from the above link (It has "CyanogenMod 9.4.1 for VAS5054A" files for Windows) Install: Install the "Common Files" and "App Support" and "Driver Support" Plug: connect the device to windows and find the file "libusb-win32-1.0.dll" Open the file libusb-win32-1.0.dll and extract the "VAS5054A.inf" file Copy "VAS5054A.inf" to device "hardware\drivers\inf\usb". "Windows can still work without internet" I found a solution here You can find the complete guide from here. Q: Proof of $\varphi(n) \mid \phi(n)$, there is an n_0 such that: $n > n_0 \implies \phi(n) \mid \varphi(n)$
